

POLY-EPOXY

UNIQUE

POLY-EPOXY adhesive combines our Polyester & Vinyl Ester resin technology providing the strongest bond available in a Polyester formula.

Great for seaming, mitering and laminating all types of natural and engineered stone.

POLY-EPOXY has a very unique, smooth consistency and is an excellent choice for strong bonds with indoor applications.

FAST & EASY

POLY-EPOXY uses the same white paste hardener (BPO) as our Polyesters, Vinyl Esters, Modified Vinyl Esters, Modified Acrylics and Acrylics.

POLY-EPOXY has a gel time of 4-6 minutes and is fully cured in 20-25 minutes.

POLY-EPOXY is translucent and light in color for invisible joints. Can be used “as-is” or tint with Superior Coloring Paste for perfect color matching.
