

Superior LIGHTNING

How to Use Superior LIGHTNING

Superior LIGHTNING is a professional-grade, fast-acting enhancer formulated to permanently deepen color and blend edge profiles with stone surfaces. For best results, follow the directions below carefully.

Application Directions

- Always TEST a small area on each type of stone before full application to confirm the desired appearance and absorption.
- Ensure the stone surface is clean and completely dry before application.
- Do not apply in direct sunlight, as it may cause uneven absorption or streaking.
- The Ideal surface temperature for application is between 50°F–85°F (10°C–29°C).
- Apply LIGHTNING evenly using a clean towel, sponge, or paintbrush.
 - Do not pour LIGHTNING directly onto the stone surface.
 - Avoid pooling or puddling to prevent uneven finishes.
- Wipe the surface dry within 5–10 minutes of application to prevent residue or streaking.
- LIGHTNING is a permanent, penetrating solution and cannot be removed by scraping or stripping after application.
