

# **Superior ACETONE and DENATURED ALCOHOL**

### **How to Use Superior ACETONE**

Powerful Solvent for Cleaning, Degreasing & Surface Prep

Directions for Use:

- Use only as directed by the manufacturer of the material or adhesive you are cleaning or thinning.
- Apply acetone to a clean cloth or towel and wipe the surface as required.
- Do not apply to more than 1 square foot at a time due to fire and health safety concerns.
- **IMPORTANT:** Acetone may soften or damage plastics, synthetics, or coated finishes.
  - Always test on an inconspicuous area before full use.

### **How to Use Superior DENATURED ALCOHOL**

Residue-Free Surface Cleaner for Adhesive and Resin Prep

Directions for Use:

- Use only as directed by the manufacturer of the material or substance you are cleaning.
- Apply with a clean cloth or sponge to remove residues, dust, or contaminants from surfaces before adhesive or sealant application.
- Denatured alcohol is ideal for final surface prep due to its fast evaporation and no-residue finish.

### **Storage Guidelines (Applies to Both Products)**

- Store indoors at room temperature, ideally below 75°F (24°C).
- Avoid direct sunlight, excessive heat, and freeze/thaw conditions.
- Ensure containers are tightly sealed and stored in a well-ventilated, climate-controlled environment.
- Keep away from ignition sources, open flames, and incompatible materials.
